

## Lynx Sportswear Bra Hook Modification

This minor change will eliminate extra elastic from around the hook, preventing it from turning.\*

### Instructions:

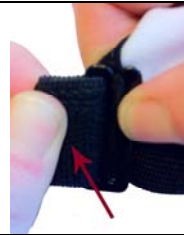

1. Hold the bra right side out, with the back of the bra facing you. The hook should be unfastened as shown in the photo to the right.

2. Flip the hook to the right, so that the **extra elastic is to the left of the hook.**

3. Pull on the extra elastic and hold it out from the edge of the hook.

4. With a sewing machine, use a straight stitch to sew the extra elastic as close to the edge of the hook as possible. Go over the stitches again to reinforce. (Stitching path shown in yellow.)

5. Note where the new stitches should be.

6. Flip the hook back over to the left.

\*If you would like us to make this minor modification to your Lynx sports bra or support tank to eliminate this issue, please send it to us at the address below:

Lynx Sportswear, P.O. Box 177, Lincroft, NJ 07738-0177

Please include a note stating that you are sending us the bra so that we can fix the hook. Also, make sure to include a return address so that we can get your Lynx sports bra or support tank back to you ASAP!
